Industry Leading Truck Aligners

No Push, No Roll, No Compensation Technology

TD8060TWS Bluetooth System

Our best selling heavy duty alignment system for in-shop use.

- Non Runout Fast Clamps for faster and more accurate measurements
- Use your smartphone or tablet to operate and view the system
- Premium software for trucks, trailers, multi-axles, coaches, cars, and light trucks
- Set-up and measuring times in as little as 2 minutes
- FastCheck software included
- Fully functional using only 4 Bluetooth measuring heads instead of 6
- Industrial quality PC with Windows OS
- Lifetime Support Package included
- New graphic based E-Z Printout
- Extremely simple operation with little training required

SmartPhone or Tablet allows you to view and operate the system remotely from anywhere in the work area.

TD8060TWS FastCheck Test Alignment System

"The Alignment Selling Machine"
Focus Your Efforts and Sell More Alignments

Dramatically increase your alignment revenue in 3 easy steps:

1. Fast check the vehicle's alignment condition in as little as 2 minutes
2. Generate e-z printout with images showing alignment condition
3. Use the e-z printout to sell the alignment to the customer based on real test results.

- Possible to fast check steer axle only with two head system
- Possible to adjust steer axle only if you wish
- Can be converted later to full 4 head alignment system
- Portable trolley does not have to be near the vehicle being tested...park it anywhere in the shop. The system will communicate wirelessly thru Bluetooth transmitting data from the heads to the console.

Combo & Mobile Alignment Systems

TD8060COMBO 6CCD

RAVAGLIOLI

Premium Alignment Support Program

LIFETIME USE OF TECHNICAL HOTLINE

Our customers have unlimited access to our technical hotline for the life of the machine. Talk to real experts who can assist you with your situation and help you reach a speedy resolution.

LIFETIME USE OF OUR INTERNET BASED SUPPORT

We are able to access your alignment system via the internet and resolve a myriad of issues without charge and without a technician coming on site. This innovative service allows us to upgrade your software and target data, diagnose system issues, conduct training and much more.

SELF HELP REPAIR INFORMATION AND TUTORIALS

More and more customers are beginning to service their own equipment. What this requires is information and spare parts if needed. We encourage the customer in this direction and gladly provide repair information and spare parts for their machine.

ONSITE SERVICE

In most areas, local RAV service is available to come on site for repairs at your location

TRAINING

We offer end user training both on site and at our center in Texas. Distributor training available at our center in Texas. Online training, videos, and tutorials are available.
