FROM

\$4,185

~~REG \$5,110~~

LEASE FOR **\$108** PER MO.

Shown with
WSA100

Column Extensions - 24"

These bolt-on extensions add 24" to overhead clearance. This allows you to service taller vehicles, such as full-size vans or "sprinters". Note that the rise of the lift does not change. Also, you need to ensure you have the required ceiling clearance.

**COMPARE
LEFT VS RIGHT!**

**Which 2-post
would YOU want?***

Answer: Left - BendPak; Right - Rotary

Lift Arm Top Plate Thickness

Carriage / Pin Hole

Let's consider things that may wear out or go wrong on a two-post lift and see what BendPak has done to minimize the risk.

Cable Sheaves and Cables

BendPak uses 5" sheaves while most other brands use 3". The larger the sheave, the less tight the cable bends, lessening cable wear and replacement. Also, BendPak uses 1/2" cable while many others use smaller 5/16" cable. Bigger cable, longer life.

Gussets

Let's face it, anybody can build a lift that goes up. The challenge is when you want to tackle a seized bolt and have to stick a pipe on the end of Johnson bar...last thing you need is for the vehicle to act like a pendulum - what we call the "wobble effect". Gussets are used to stop this. The diagram above shows the gussets used by BendPak and Rotary.

Carriage

Take a close look at our lift carriages (the lifting assembly that the arms are attached to) and then take a look at the competition. You'll notice our 53" tall carriages are considerably taller than most, which minimizes the stress placed on the load bearings and columns.

**We think you will agree
the BendPak Lift is the
BETTER CHOICE!**

**Comparison is for the BendPak XPR-10ACX vs the Rotary SPOA10.
Design features and specs are subject to change.
Please consult factories for updates.*

FOUR-POST LIFT GUIDE

Dual-Hub Cable Sheaves

Dual-hub cable sheaves are used by the top brands. However, size matters. On their 14,000 lb models, BendPak uses huge 10-1/2" diameter cable sheaves (12" on heavyweights) within the runway and cross tubes, combined with massive 2-1/4" diameter sheave pin (4" on heavyweights). Compare this to other brands 9-1/4" - 9-1/2" diameter sheaves are pretty standard and the sheave pins tend to be much smaller than BendPak's. The extra diameter improves cable wear and critical component lifespan, meaning you'll spend less money in service related expenses down the road.

Heavy-Duty Aircraft Cable

BendPak's 14,000 lb capacity models have 1/2" diameter 6 x 25 stainless-steel lifting cables that have a breaking strength of over 14,000 pounds each. This aircraft-quality cable was specifically designed for lifting applications and provides a great balance between abrasion resistance and fatigue. Most top brands will have similar 1/2" cable.

Built-in Lubrication

On BendPak lifts, grease fittings are located on every sheave and sheave axle to help keep these critical parts well lubricated and to simplify periodic maintenance. Some ALI/ETL lift brands do not offer this feature, which can lead to excessive wear on the sheaves/pins and replacement cost. In these cases, greasing requires loosening/removing of cables and removing sheaves/pins.

Adjustable Ramp

Most brands runways are fixed in a single position. Some brands, including BendPak, have a runway that is adjustable which allows for handling vehicles with a greater range of axle width.

Lift Safety Standard

Most of our lifts are third party tested by ETL and certified by ALI to meet or exceed strict ANSI standards such as 1.5 times rated capacity load test, engagement lock test, cable cut and deformation tests. Be sure the lift you buy has the gold ALI/ETL label that assures your lift has been tested to meet these standards.

Warranty

So now you are aware of some of the design and quality differences to look for in choosing your lift. As a final consideration, let's look at the warranty coverage.

Component	BendPak	Rotary	Challenger	Forward
Structure	60 month	60 month*	24 month	60 month
Hydraulics	24 month	12 month**	24 month***	18 month
Power Unit	24 month	12 month**	24 month***	18 month
Wear & Tear	12 month**	12 month**	12 month	12 month
Shipping	12 month	12 month	12 month	18 month
Labor	12 month	12 month	12 month	6 month

* up to 30,000 lb capacity models only. Over 30,000 lb models have only 12 month warranty.

** increases to 24 months if installed by an Authorized Installer (excluding Rotary lifts over 30,000 lb capacity which are limited to 12 months)

*** certain models are limited to 12 months

Also, please be aware that all comparisons to other brands, and other representations such as warranties, etc. are accurate to the best of our ability but are subject to change. They are intended as a guide and please consult directly with manufacturer's websites for the most current information.

LEASE FOR **\$102** PER MO.

3D Quick-Touch™ Automatic data entry of the distance, diameter and width.

Laser-Spot Accuracy

Lasers are increasingly being used in high-volume shops because they speed up weight placements by eliminating any second-guessing. This also means the balance check you perform after placing the inboard and outboard weights will almost always be clean. The fewer weights you use, the better your bottom line.

PARKING/STORAGE

babcopark

Choose the right car parking system for your needs!

BIPARK

Bipark is a compact double car stacker. This product is compactly designed to allow several vehicles to be parked in a relatively small space. The platform has different capacities and dimensions in order to be able to accommodate SUV's, 4-wheel drive vehicles and low clearance sports cars. Capacities: 5,700 lbs. to 7,000 lbs.

BIPARK

SPACER 25/2

TRIPARK

Tripark is a compact triple car stacker that allows you to park several cars in an extremely limited space. The Tripark is uniquely designed to accommodate SUV's, 4-wheel drive vehicles and low-clearance sports cars.

TRIPARK

SPACER 25/2

Spacer 25/2 belongs to the independent double-stacker family and requires a pit. This design allows you to move cars independently so that the cars parked on the upper platform can be removed without moving the cars parked on the lower platform. Capacity: 5,500 lbs. per platform.

DOUBLE SPACER 25/2

Double Spacer 25/2 is similar to Spacer 25/2. However, the Double Spacer 25/2 can accommodate four cars at a time. Capacity: 5,500 lbs. per parking space.

DOUBLE SPACER 25/2

DUPLO

The Duplo Model is an underground parking system that facilitates two vehicles to be parked in the same space. One vehicle would be parked in the pit on the lower platform, while another vehicle can be parked on the roof when the Duplo is submerged. The roof can blend in with the surrounding area so that your additional car can be safely and discretely parked.

DUPLO

babcopark

Whatever your vehicle parking needs are, BabcoPark has the world-class parking lift solutions! Our comprehensive range, features a wide array of models, including dependent and independent stackers, vehicle turntables, and lift platforms for both vehicles and goods.

PARKING SOLUTIONS

REX

REX parking lifts and car elevators are pantograph-style lifting systems with a capacity ranging from 5,500 lbs. to 6,600 lbs. These parking lifts are uniquely and safely designed to lift cars without the need to distribute the weight on the whole platform. The REX parking system comes in two different models. Capacity: 5,500 lbs. to 6,600 lbs.

MOVE

MOVE Parking lifts and car elevators are designed with a two-column system. The columns are placed on opposite sides along the sides of the platform. The MOVE parking system has a capacity of up to 6,600 lbs. The MOVE Parking system comes in two different models. Capacity: 6,600 lbs.

TECHNOPARK & SLIDE-PARK

TECHNOPARK & SLIDE-PARK

Our Technopark & Slide-Park are automatic and semi-automatic parking systems. Their futuristic design and rugged dependability are the perfect solution to handle your modern high-congestion parking needs. Capacities: 4,400 lbs. to 6,600 lbs.

TURNTABLE

With customizable solutions to match your flooring and diameters and capacities to meet your vehicle's needs, OMER's Turntable is a great solution to showcase all 360 degrees of your vehicle. Capacities: 5,500 lbs. to 17,600 lbs.

INCLUDES FREE SHIPPING TO ~~MANY~~ *most* LOCATIONS

Save Space in Style

- ✓ Invisible, unobtrusive, aesthetically pleasing
- ✓ Safe, reliable parking solutions for home or business
- ✓ Many models and styles to suit your parking needs

SUBTERRA PARKING LIFT

The Subterra Parking Lift is the newest and most innovative invisible parking solution available to the home market and auto aficionados everywhere.

Designed to move vehicles from ground level to an underground space much like an elevator, our Subterra Lifts are perfect for storing and transporting vehicles safely and easily. While both single and double-deck Subterra Lifts will safely and easily transport your vehicles from one level to another, our double-deck version goes a step further by allowing you to park a second vehicle on the top deck, flush with the ground, fully concealing the vehicle below it.

HP-5950 DOUBLE CAR PARKING LIFT

Double Your Parking Spaces
