Four-Post Lifts

SKU# 5175173 14,000-lb. Capacity, Four-Post Lift / Extended

HDS-14 Four-Post Car Lift: No Such Thing as Overboard

A longer <u>four-post lift</u> is useful for vehicles like limos, SUVs and trucks, and that's where the HDS-14X comes in handy. We call it our "limo style" lift because of how much front-to-back clearance it offers, so you can make it over or under the lift with ease. This lift adds additional versatility and craftsmanship to your garage.

Choose Tall or Standard Length

SKU#	Model	Description
5175170	HDS-14	Standard Length
5175004	HD-14T	82" Rise

Features

- 14,000-lb. lifting capacity
- CE Approved and Certified. Meets or exceeds the standards prescribed by European Standard EN-1493
- Mid to long-style approach ramps for low ground clearance vehicles
- Runways include rail-kit for optional accessories
- Single hydraulic cylinder mounted underneath runway
- Fully enclosed lifting cables, safety locks and sheaves
- Internal anti-sway slider blocks in each column
- Pneumatic push-button safety release
- Heavy-duty 1/2" aircraft cable and 1.75" roller axles
- Safety locks enclosed in columns minimize pinch points
- Oversized sheave diameter reduces cable fatigue
- Oversized self-lubricating cable rollers
- Multi-position safety locks in each column
- Customizable power unit location
- Approach ramps incorporate built-in rear-wheel chocks
- Independent backup slack-cable safety latches
- Runways feature non-skid surface
- Optional drive-thru ramps available
- Optional drip trays available
- Optional 7,000-lb. capacity rolling jacks available
- ETL approved

Extended runways

14,000-lb. vehicles have wheelbases that need specialized equipment to keep them safe and supported. Our extended runways prevent wear and tear on your vehicle; driving onto a car lift runway should not feel like your truck is climbing Mt. Everest.

Dual-hub cable sheaves

Dual-hub cable sheaves reduce stress, fatigue and wear. Huge 10.5" diameter cable sheaves within the runway and cross tubes combine with massive 2.25" diameter sheave axles. This dramatically improves cable wear and critical component lifespan, which means less service-related expenses down the road.

Heavy-duty aircraft cable

This car lift features four, 1/2" diameter, 6 x 25 stainless-steel lifting cables that have a breaking strength of over 14,000 lbs. each. This aircraft-quality cable was specifically designed for lifting applications and provides a great balance between abrasion resistance and fatigue.

Built-in lubrication

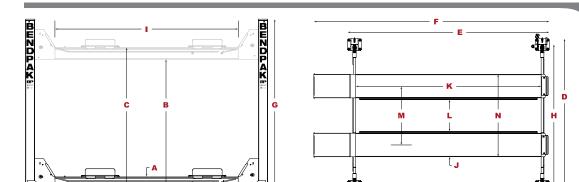

Grease fittings are located on every sheave and sheave axle to help keep these critical parts well-lubricated and simplify periodic maintenance.

Large base plates

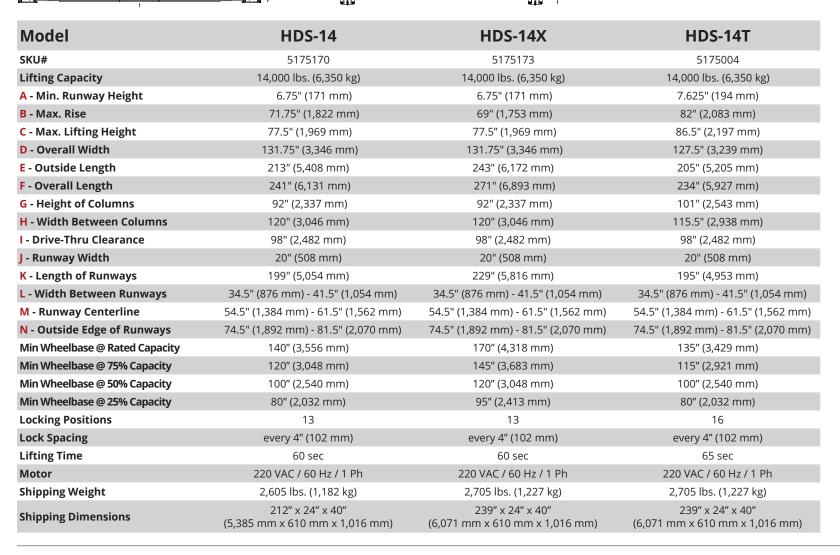

10" x 12" base plates provide a solid foundation for every 14K capacity four-post car lift.

Spring-loaded safety locks

Safety locks automatically engage continuously during rise, and adjustable safety ladders allow for precise runway leveling, even when installed on sloped floors.

An air supply (minimum 30 psi / 3 CFM) is required for the safety-lock mechanisms to disengage. It is solely the responsibility of the end-user to provide, install and maintain the air supply.

Not all BendPak lift models meet the standards as prescribed by ANSI/ALI ALCTV-2011 or ANSI/UL 201. Consult www.autolift.org for a complete list or contact BendPak via contact@bendpak.com.
